VDOT Issues Weight and Hours of Service Waiver for State Roads Thru August 14

In response to the anticipated impacts associated with tropical Storm Debby, the Virginia Department of Transportation has issued a waiver for carriers transporting essential emergency relief supplies providing emergency restoration of infrastructure services.

The waiver applies to transportation of water, food, heating oil, motor fuels and propane as essential commodities. A copy of the waiver can be found below and copies of it should be placed in all your trucks thru August 14. It is important to remember that this waiver applies to state roads only and is not valid on interstate highways as there is no associated federal emergency declaration at this time.
