## EPA Issues RFG Waiver

Last night acting EPA Administrator Andrew Wheeler approved the waiver to allow conventional gasoline to be sold in Southern Virginia RFG areas in light of supply disruptions caused by Hurricane Florence. The waiver is effective until September 30, however distributors may continue selling conventional product after September 30 if product is in terminal storage or retail outlets until their supplies are depleted. This waiver does not apply to Northern Virginia, but does apply to all metropolitan Richmond and Hampton Roads locations. A copy of the waiver [can be found here](#) and should be distributed to all offices and in trucks transporting such products. A copy of this document should be in all trucks handling conventional gasoline for the duration of the waiver.
